Dual Fuel Users Manual Installation - Maintenance Instructions U103490 - 04 Page 22 Be safe Warning Accessible parts will become hot to use. To avoid burns and burns, children should be kept away. You need clean fresh air - so does your stove. The flames burners produce exhaust, heat and moisture. Make sure the kitchen is well ventilated: keep the natural air vents open or install a power cooker hood that has air vents outside. If you have multiple burners or use the stove for a long time, open the window or turn on the extractor fan. For more information, see Installation Instructions. We describe some basic guidelines on how to safely use a gas stove. Gas and electricity on Make are sure that the gas supply is on and that the stove is connected and turned on. The stove needs electricity. Peculiar smells When you first use a stove it can give a small smell. This should stop after a little use. Before using for first time, make sure all the packaging materials have been removed and then, to dispel the production odors, turn the oven up to 240 degrees Celsius and work for an hour. Make sure the room is well ventilated under the outside air by opening the windows or turning on the hood of the stove, for example. We recommend that people with respiratory or allergic problems release the area during this short period. Before using the grill for first time you should also turn on the grill and work for 30 minutes with the grill pan in position, pushed completely backwards, and the grill door is open. Installation in the UK plate must be installed by a registered CORGI engineer. Failure to properly install the device can result in invalidation of any warranty requirements or liability requirements and lead to prosecution. This device is installed in accordance with the current rules and only in a well-ventilated room. Read the instructions before installing or using this device. This device should not be installed in a boat or caravan. Currently, almost all pots are suitable for induction. You can easily check whether you can use your old pans on induction by holding the magnet against the bottom of the pan. If the magnet stays in the pan, your old pan is suitable for induction. Page 2 Nowadays almost all pans are suitable for induction. You can easily check whether you can use your old pans on induction by holding the magnet against the bottom of the pan. If the magnet stays in the pan, your old pan is suitable for induction. Page 3 Nowadays almost all pans are suitable for induction. You can easily check whether your old pans are on induction, holding the magnet against the bottom of the pan. If the magnet stays in the pan, your old pan is suitable for induction. ©2020 Rangemaster is the trading name of AGA Rangemaster Limited.
